The *Birding Notebook* is a companion to [Audubon Birding Adventures for Kids](#), sold separately.

Produced in association with the National Audubon Society, [Audubon Birding Adventures for Kids](#) introduces you and your children to the love of all things birding.

Whether exploring the forest, the backyard, or the city, you and your kids will learn about the habits of North America's most popular songbirds, how to create safe and welcoming environments for them, how to observe them, and how to construct easy and safe species-appropriate birdhouses and feeders for common birds. The bird ID section includes descriptions of species and range maps.

Kids will also find 20 exciting activities and games (10 indoor, 10 outdoor), including how to form birding groups, scavenger hunts, and a birdsong listening game. In addition to practical, field-tested knowledge and fascinating information about the species covered, this guide is packed with beautiful color photography.

Since all the information presented is the product of years of National Audubon Society expertise, both you and your kids can be sure you're getting the best advice before setting about your birding adventures.

MEET THE BIRDS

Using the information found in the **yellow box on page 11** of *Audubon Birding Adventures for Kids*, list the birds you might see in each common bird habitat. Select one of the birds from each habitat and sketch a picture of it using the book or Internet with a parent's permission.
